CONTENTS & ORDERING

A5 / 24 pages

SECTION	PAGES
Injectors - 27 applications	03-06
Diesel injection pumps - 27 applications	07-10
Turbochargers - 27 applications	11-14
Nozzles	15
Rotor heads	16
Pump elements	17
Valves & rail-pressure sensors	18
Replacement diesel engines	19
Expert identification & workshop guidance	20-21
Photo source register	22-23
Contact & catalogue notes	24

ORDER THE RIGHT PART THE FIRST TIME

1. Send the complete manufacturer part number and OE number.
2. Add the vehicle VIN/chassis, engine code, model and year.
3. Photograph the label/stamping, connector, flange and fuel ports.
4. For turbos, confirm actuator type plus oil/water cooling layout.
5. For mechanical parts, confirm rotation, plunger size and cylinder count.

HOW TO READ EACH PRODUCT CARD

PART NUMBER	Primary manufacturer or recognised service reference.
OE	Vehicle/engine maker cross-reference where supplied.
APPLICATION	Common engine or vehicle family; not a substitute for VIN verification.

INJECTORS

Denso / Bosch / Delphi / Continental / unit injectors

27 HIGH-DEMAND INJECTOR APPLICATIONS

Representativevehiclefamiliesshownbelow;alwaysconfirmexactfitmentbypartnumber and engine code.

IDENTIFY

Use the complete manufacturer number plus OE cross-reference. Connector shape or pin count alone is not a safe match.

VERIFY

Confirm engine code, vehicle generation, emissions level and solenoid versus piezo technology before ordering.

INSTALL

Renew seals, inspect the seat, use clean handling and complete correction coding or relearn where required.

DIESEL INJECTION PUMPS

VE / VP44 / HP0 / HP4 / CP3 / inline

27 MECHANICAL & COMMON-RAIL PUMPS

Representativevehiclefamiliesshownbelow;alwaysconfirmexactfitmentbypart number and engine code.

SYSTEM

First identify the pump family: mechanical VE/inline, electronic VP44, or common-rail HP0/HP3/HP4/CP3.

HARDWARE

Match flange, drive, shaft, rotation, ports and pressure-control architecture. Similar housings can hide major differences.

PROTECT

Clean the tank and lines, replace filters and prime with clean fuel. A contaminated or dry start can destroy a new pump.

Representativevehiclefamiliesshownbelow;alwaysconfirmexactfitmentbypartnumberandengine code.

ASSEMBLY NO.

Match the complete OE or turbo assembly number. A family name such as CT16, RHF5 or HX35 is not specific enough.

ACTUATOR

Confirm wastegate, pneumatic VNT or electronic actuator, plus oil/water cooling and housing orientation.

ROOT CAUSE

Inspect oil feed/return, intercooler, intake, exhaust restriction and crankcase ventilation before replacement.

EXPERT GUIDE

MATCH THE PART CORRECTLY

Appearance alone is never enough

INJECTORS

- Read the full Bosch/Denso/Delphi/Continental number.
- Confirm solenoid vs piezo and connector generation.
- Match OE number, engine code and emissions level.
- Record correction/calibration code where applicable.
- Renew the sealing washer and follow coding procedure.

PUMPS

- Identify VE, VP44, HP0/HP3/HP4, CP3 or inline family.
- Match flange, drive, rotation and pressure-control layout.
- Confirm SCV/PCV number - colour alone is unreliable.
- Flush contaminated tanks, lines and rail before fitting.
- Prime with clean fuel; never run a dry high-pressure pump.

TURBOCHARGERS

- Match OE/assembly number, not only the turbo family.
- Confirm wastegate, pneumatic VNT or electronic actuator.
- Verify oil/water ports and housing orientation.
- Inspect feed/return lines, intercooler and crankcase breathing.
- Pre-lube and correct the original failure before startup.

CATALOGUE RULE

A substitute shown in the source list still requires dimensional, hydraulic and calibration confirmation before sale or fitment.

EXPERT GUIDE

CLEAN FUEL SYSTEM WORKFLOW

Fromdiagnosistoverified delivery

01

INSPECT

Capture complaint, fault codes, leak-off/balance data and fuel condition.

02

IDENTIFY

Read part numbers before dismantling; record engine, VIN and hardware generation.

03

CLEAN

Use capped, lint-free handling. Remove water, rust and metal contamination from the system.

04

TEST

Bench-test pressure, delivery, leakage, spray pattern or actuator response as applicable.

05

CALIBRATE

Set mechanical or electronic parameters to the correct specification and record results.

06

INSTALL

Renew seals, prime correctly, follow torque values and complete relearn/coding where required.

STOP AND INVESTIGATE BEFORE FITTING A NEW PART

- Metal flakes in fuel
- Restricted oil feed/return
- Incorrect rail-pressure signal
- Water or microbial contamination
- Unresolved overboost/underboost
- Damaged injector seat

CATALOGUE NOTES

- Part numbers and applications are technical references, not a universal fitment guarantee.
- Always confirm VIN/chassis, engine code, OE number, hardware generation and calibration.
- Stock, brands, packaging and supplier availability may change without notice.
- Third-party trademarks remain the property of their respective owners.

SEND THE PART NUMBER. WE WILL HELP MATCH THE SYSTEM.

Compiled from the 2026 Tomdiesel technical list and public manufacturer/distributor references.
